operated bead breaking
system with ergonomic
control console

Bead-breaker angle
adjustable to three
positions with WDK stroke
limiter

Pressure reading unit with
holder

Pedal-operated inflation
system (GP version)

NEW LEVERLESS

On the **S45 TLP TOP** we offer the new **version of the Lever-Less system**, which combines the **practicality of the body, made of technological plastic**, with the **toughness of steel** in a new guise. The plastic body makes it possible to forget about replacing the plastic guards used on other solutions, and any contact between turret and rim will not result in scratches. The new steel dismounting system features a spring-loaded coupling system (S1000 - Patented) and an extended body to facilitate the 'capture' of any bead.

NEW POWER OUT

The new **Power Out** bead-breaking system allows you to comfortably manage each bead-breaking step via the ergonomic handle.

The two practical Open - Close buttons allow bead-breaking to be performed without stressing the tyre and without the risk of scratching the rim.

SUPPLIED ACCESSORIES

TECHNICAL DATA	S45 TLP Top
Inside clamping capacity	14" ÷ 27"
Outside clamping capacity	12" ÷ 24"
Max. wheel diameter	1100 mm
Maximum wheel width	350 mm
Power supply	230V - 1Ph - 50/60Hz
Dimensions (WxHxD)	267x210x190
Weight	430 kg (S45 TLP Top)
