The **XPress 1000 SC** is a compact, powerful, and exceptionally reliable **Impact Riveting Unit**, designed for high-speed processing of rivets with outstanding setting force.

Its innovative, user-friendly **Secondary-Side Force Adjustment** sets it apart from other systems, offering greater flexibility and **Precise Control** of the riveting process. Suitable for both repair and production environments, the **XPress 1000 SC** ensures **accurate, efficient, and time-saving workflows**.

A key feature is the patented **Smart Control function**, which enables a **controlled, force-free fast feed**:

Fast feed – the tool quickly approaches the workpiece without applying force.

Working feed – once in position, the pressing or pulling operation is executed with full setting force.

This controlled transition allows **precise and safe tool positioning**, especially for sensitive riveting applications.

Thanks to the simple **Quick-Coupling System** and full compatibility with the XSeries family of riveting tools from WS Wieländer + Schill, the XPress 1000 SC covers the entire **range of riveting repair technology**.

PowerPack | XPress 1000 SC

Item no. 700090

As the central unit of the **XSeries**, the **PowerPack SC** combines the functions of **pressure generation, control, setting monitoring, and safety**.

The **PowerPack SC** is a compact, pneumatically-hydraulically driven pressure intensifier equipped with a two-stage high-pressure pump.

A **primary air pressure of 8 bar** generates a hydraulic **secondary pressure of 1000 bar**.

Its ergonomic design allows effortless and process-safe execution of all operations.

Thanks to full compatibility with the **XSeries**, the new PowerPack can be combined with all existing tool sets.
